Written by ERISA Attorneys

This language resulted from a collaboration of QDRO Group's actuarial and legal teams over a period of several months. Our retirement plan specialists provided practical input based on specific plan knowledge and experience as well as battle-tested insights gained from hundreds of appearances as expert witnesses. Our two ERISA attorneys translated those insights into clear and concise provisions that protect the parties – and the attorneys involved. This was an iterative process with numerous revisions that resulted in detailed language to safely secure a division of retirement assets.
